

Grand Fougeray, 20th of June 2009

Dear Madam, Dear Sir,

Our company, **LOGISTIC SOLUTIONS**, specialized in modular camps, develops a unique, fast deployable, mobile camp system, to be used wherever necessary for military, civilian and humanitarian projects.

The basic idea is to have all different units, such as tents, accommodation units, kitchens, showers, and toilets etc. all built in 20'' or 40'' standard ISO containers.

LOGISTIC SOLUTIONS also provide the infrastructure construction such as the whole electricity, sewage and communication grids as well as roads, parking lots and helipads.

These types of camps are suited to help the people victims after a natural disaster or to help the internally displaced people during a conflict. But they are heavy means which need more time to be dispatched wherever necessary worldwide.

It's why **LOGISTIC SOLUTIONS** is pleased to inform you today, 20th of June, day celebrated as World Refugee Day, that we have just developed a brand new product, called **resQbox**, to respond immediately to emergencies within the first hours after the natural or other disasters.

Our **resQbox** has been designed to provide worldwide, in an extremely robust container, to a 6-member family the full needs during the first 3 days after disaster. Each Rescue box contains accommodation equipments, a well balanced complete food enable to feed 6 people during 3 days, cooking utensils, sanitary products and first aid kit.

Please, find here attached the PDF file presentation with more information about this new concept. Should you have any needs for further information about **resQbox**, do not hesitate to contact us.

Thanking you for your time and consideration and hoping to hear from you soon, we remain,

Yours truly

Gilbert GENEY and Norbert JANVIER
